# Assignment #  
\* Define a problem statement and give a brief Executive Summary Snapshot.

- A) Executive Summary.
- B) project description.
- C) project scope.

## ① Executive Summary

- Analysis
- finding
- Project Description
- Scope
- proposed process.

## ② Project Description

- Project purpose
- current solution
- challenges?
- why? take the project.

## ③ Project scope.

- Project specific goal's
- Tasks
- Deliverables
- costs
- Deadlines.

- Problem :- "our shopkeeper faces a problem like Bookkeeping" in day to day life we say that shopkeeper is provider of daily life needs. but he face a problem like. He write Bookkeeping in notebook when notebook are lose his detailed data also lost there fore he having a loss of money. So thats why we made a platform to get easier his Bookkeeping problem

### 1) Executive summary snapshot.

- Research suggest that we have to develop mobile based platform for shopkeeper.
- we have to need design the app. and make it properly or easily to handle everyone.
- we need customers contact Number and Names so we inform them How much amount are remaining to pay.
- The scope of project is Develop a mobile based platform in simple way to handle everyone in our India.
- we have to code it properly and make user freindly app. and detailed of every customer only write a name of customer or getting all detailed of this customer How much amount are remaining to pay a shopkeeper and How much amount He pay. thats all detailed of customer are save in this app

## 2) Project Description

- to make a calculation of shopkeeper's easily and saving money of shopkeeper's that he spend in to take the notebook.
- current solution is used the notebook and keeping safely data into this Register or Notebook.
- we face that challenges in thinking or desining the software.
- The reason behind to take the project is make easier life of every shopkeeper and reduce losses of a shopkeeper.

## 3) Project Scope.

- The project goal is Design and Develop the mobile app and web-portal an we have to doing our best and bug freely app. and spread it into every ever in our india,
- We have task develop a mobile-based platform and ensure scalability, security and correct data or privacy and when App get launched then Gathered feedback of people.
- we have to deliver the App in 7 month.
- The cost of the project  
To make a Software we need around = 5,00,000

- we have to give some deadline for ~~branch~~ launching app. In previous project we give 6 month. Now we have to give '7' month deadline. first
